## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 2-25 are allowable over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

As per the independent claims the specific limitations pertaining to a convolution system that modifies an input vector with a fixed waveform to transform a waveform of the input vector, wherein the modified transformed input vector to a speech codec as an excitation vector in conjunction with a random code vector being decoded by the input vector is not explicitly taught by the prior art of record. With respect to the prior art of record, 1) Ozawa teaches the convolution of an excitation vector with an impulse response of a synthesis filter, 2) Tzeng teaches producing an excitation vector (which comprises a waveform superimposed upon a plurality of pulses) by adding a noise signal from a codebook generator to a pulse excitation vector, 3) Yip et al (5187745) teaches the convolution of the impulse response function with the signal, but all three fail to disclose the modification of an input vector with pre-stored fixed waveform in addition to the specific referred to convolution calculation as noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
